If you could pack up a bunch of things from the institute to keep with you forever, what will those be?

I'd pack all the people and the hostel with it. I am serious, plans are being made.

Yearbook
2020

Santnam Bakshi : We have run into each other many times in the last 5 years, but mostly in the last year to have long discussions on a variety of topics. I enjoyed your hard rational and critical thought process on several topics of discussion, And the deep jokes on capitalism and socialism in the quest to find the flaws in these various ideologies and how intertwined they are in our everyday lives.

Krutika Talegaonkar : Hey dude!!! Though I have mostly known you since last year only but it's amazing to know a machau like you. Your stories from your US, Canada, Singapore trips. It's fun to listen to all those. When you had guided me about Sysmex SOP there were a lot of things I learnt from you. Thanks to you that I know world better now. Baki best of luck for the HONDA journey and keep sending chocolates wherever you go!!

Lakshya Bandhu : Hey Satyam, we have had a lot of conversations about several different things, sometimes in wierd places like the shed near H5 when it was raining like hell and also in H18 mess, UG's meets etc. It was always very informative for me and I also got to know you well. I believe we will get a chance to talk again till then stay safe and all the best for your future 😊

Abhijeet Aanand : Hey Satyam!! It was nice bumping into you in department at times. Thanks for all those fundae which you gave. Won't forgot when we teamed up for that baddy match. Baaki help ke liye aapko tang to krte rhuga mai. I know you will kill it in Japan. All the best !!

Yearbook
2020

Kinjal Saxena : Hi Satyam! I met you in a tech team sophie year mein. Tabse we've discussed how common our paths have had been. Our discussions are always fun and aapke itne plans sunke I feel motivated myself and kaafi cheezein clear hoti. I took infi guidance from you during Honda YES and aage bhi we will stay in touch. Aise hi machate raho :p and keep motivating me!!

Shantanu Thada : Yo Mohla! I can easily say that you have been killin' it with your research work with the Director ofc _/_. Yes, we did not talk much but I will really cherish whatever interactions we have had in the past few months! I am sure, with that enthu, you will do exceptionally well on the path that you choose! All the best for your future endeavours <3

Abhishek Singhal : Yo Mohla bro!! Waise toh apni majorly baat last year mai hi hui (apart from honda YES) but jitni bhi hui it was exciting to know more from you everytime. Tere saath career plans discuss krke bhi acha lga. You had so much already planned man! Also mast research mai macha rha tu! Glad ki apne finance ke interest match krte aur pichle ek mahine phele apan ne kafi discuss kiya stock markets. Aise hi machata reh and I am sure you will achieve great heights. Jab kisi badi company ka CEO ban jayega toh bhool mat jana hme. All the best bro. Stay in touch!

Pranav Sankhe : Yo Mohla! Kaafi interesting and peculiar banda hai tu. Running into you and having conversations over research and future plans have always been interesting. And yes, Kangana's Queen xD I hope you are joining Honda. See you in Tokyo!

Yearbook
2020

Karan Trichal : Hey man! We'd been tut mates for the longest time possible, and one of my very first memories of you is of you going on passionately about science and engineering. I now see the same passion in you when you talk about tech policy and getting into management, and it's amazing to see that you've lost none of the fire in the years that followed :D Look forward to more amazing conversations when we've both gotten where we want to go. And with your passion and commitment and smartness, I'm just very, very sure that you'll make it to your dream place! Loads of love, and stay in touch! :D

Nimit Himanshu Kapadia : Yo Mohla!! Yes, we have come a long way from the same hostel H16, same floor 4th floor, same divisions D2 in first year, same dept after branch change, same specialization, same thesis guide to same job locations. I guess we tend to have a lot of common interests :P. Life mein kaafi machaya hai tune and keep doing so!! Best wishes!!

Darshan Tank : Mola ji, aapke baare me kya hi bole. Har cheez me machate ho. Bhai last year me to kitne baar mere room pe infi discussions hue hai. Placements me to kaafi clear tha tera scene. Tu bas ek sath bohot saari machhliyo ke pichhe bhagta hai, wo kam karde thoda. Baki, See you in Tokyo!

Pawan Kumar Khanna : Yo Satyam! Sadly I only got to know you properly in our last year(even though we are from the same city:P) but what a talented and pleasant person you are! Your depth of thinking really impressed me during our brief discussions. Japan mein ja ke bhi macha dena! I know you will excel in whatever you do. Thora time nikalke dosto se bhi milte rehna future mein!!

Yearbook
2020

Rishika Gupta : Hellooo! We first met in my freshie year at the E-Summit where you pulled me out of no where blackmailing emotionally to anchor a lecture. Uski treat abhi tak pending hai :P You have slayed in all the fields who have stepped into. Hats off! I wish we would have interacted more. There's so much to learn from you but nevertheless, I am glad I met you. Aise hi machate rehna and stay in touch :D

Aditya Tapase : Hi Satyam, I always enjoyed those detailed discussions (mostly you talked, I listened 😊) we used to have. It was great to see you so engrossed in all those tech, projects and activities. I still cannot get how you manage to keep flying here and there for those things and also manage the insti stuff. One thing I have learned from you is the importance of networking in life. I really admire your networking skills which have taken you to such great success. I wish you the best for the future. Stay in touch and do keep me in your networks!

Anmol Gupta : Hey man! First of all, I had an image of you as a guy who was completely engrossed in tech and didn't care much about other stuff, but interactions in the final year really changed that perception. H12 mess mein those few breakfasts perhaps laid the foundation for that, jisme I got to know how you've been involved in so many 'ventures'! And then those discussions on MBA prospects and other programs were great too! Legit thanks for that talk, you gave me quite some good insights! Placements mein I think you had the highest confidence of getting where you wanted amongst anyone I know - that was amazing dude! (Ofc you got in!) Realizing common interests lately has been great XD. All the best

Apurv Tiwari : Mr. Hamster! Main nahi badal raha naam ye, ab lagte ho hamster jaise to lagte ho main kya karun :P Freshie year ka lukkha was fun, and even the heated up discussions were so childish and memorable. Uske baad to tum busy ho gaye, but fir bhi idhar udhar mil hi jate the. And final year mein to same floor par rehna was fun. You were one of the last people to leave 18, like you left even after us, such senti! :o All the best future ke liye :D

I'd pack all the people and the hostel with it. I am serious, plans are being made.

Yearbook
2020

Mookund Sureka : yes our paths have crossed too many times and it also got bit fierce during the secy tenure:p. But your knowledge about so many things is amazing and you'll do great at anything you touch :) . All the very best :)

Neeraj Sohani : Hey Mohla! You're a brilliant guy and I hope that you keep machaofying wherever you plan to go (I'm really confused because you prepared and are preparing for everything :P). Also, thanks for all the tshirts that you've lent me <3 Stay happy, stay blessed!

Ritik Madan : I've always been amazed by your all-rounded achievements, be it academics or otherwise, which are unorthodox yet exceptional. I personally believe you'll pull off even more amazing stuff in future without any doubt. You've been to Japan so many times that perhaps the Japanese culture might be catching up on you (your Kimono has been quite famous BTW XD). Wishing you all the success in life dude. Keep in touch :')

Anand Naik : Mohla, I knew you from second year but I got to know you only in the 8th sem properly because of Prof. Udayan's group but still when I talk with you it feels I have known you forever. We attended two of Prof's parties together and after the second one while walking back to the hostel we had to take shelter in the Campus hub bus stop with a cow bcz of rains. There we discussed a lot of things and I got to know that you are a hardcore Billions fan just like myself. And we had a lot of interesting conversations with you in the H18 mess. Abhi Japan ja raha hai tu, kafi miss karunga tuzhe! Par mostly hum dono paas hi honge toh milte rehna. Aur bhi kafi bate karni hai
