**Arpit Agarwal :** I think we cant forget the smart way of placing your thumb exactly below 2 plates to do you know what.. Idk why but such activities still give me thrill. I still laugh sometime on the misfortune you had because the prof wished to have a VIVA!! IE 604 was fun! Solving papers together made the hectic placement process fun! I really liked the way you were so focused on getting a job in a specific field unlike us. Playing Bridge, 350 was fun and do message me if you would like to play such games in future. We have an app to help us out!
