2020

Abhinav Jain : From "kya mast banda hai yaar yeh" in the first year to "Yeh banda mere room se jata kyun nhi hai..." in the fourth year our friendship grew up! I bet that no one can match our levels of telepathetic connections and our ability to understand each other's point of view. You have been an inspiration to me in many different fields be it hard work, coding, or other kinds of stuff. Inshort, Patil machata hai :-D

Aditya Chalishazar : Patil jiii... From all the election prep to everything that has happened after that. It's really weird that 3 months seem like years. All the tiny bottles, and all the CC conversations, plus all the Gods and Goddesses wale conversations. Kitna machate ho! Thank you for adding a dash of humour to the lives of all around you (thank you for the birthday wishes, they were awesome!!) Let's hope we never have to face anything like WTF 16 Feb... All the best for everything to come! Stay in touch (more importantly, stay the same)! :)

akash kumar : Patil Sir. literally the best developer I have ever seen. Kaaafi respect for that. We met the first time through himank, kaafi doubts puchna, discussions, random talks. It was great to get to know you. Kaafi busy rehta hai apparently, and we didn't get to hangout much, but I hope we remain in touch. Always be the super cool guy you are!

Yearbook
2020

Nautatava Navlakha : From being a pakka maggu to bunking all the classes in semester, from a person who doesn't like to interact much to one of the most interactive guy, you grew up. This guy is easily the laziest yet the most hardworking person I have ever met♥. The best co I could have ever asked for, those 5-am midnight works, visits to Utsav, the (sexrets) we shared, the super-creepy talks we could have, trip to Lonavala, bike drive on marine drive, the japan keychain, the elections times are the most amazing memories! You are really a inspiration and best friend to me. Word limit's being reached and I still have loads to tell. Hamesha be the same and keep in touch. See you as soon as the lockdown's over!

Shobhna Misra : Patil! Yes, it was the strangest of circumstances indeed, how we started to get to know each other. And, it has been one hell of a journey since then. From helping put up my flexes (we didn't even know each other then!) to making the Achievements section in InstiApp and leading the Inter IIT Contingent (remember that silver medal? :P), you have done it all, and you have never hesitated to help whenever I need it. I don't say this enough: thank you so very much for everything! And I have no doubt that you'll continue to annoy me forever :P All the best for your Masters! :D

Pujan Biswas : def senti : Chappal utaar ke & nahake likh raha hoon because swayam bhagwaan ke baare mai hai. Kaise karlete ho atah impossible coding, I'm almost jealous (Zucc wrote this). But god bhi kuch paap toh karte hai :P Himank ka chuha scene, andhere mai impossible jo hai ... , and kaaaaafi aur dank tshirt distrubution scenes. Too much to tell. However, I am proud to see how you rose back from that extreme low. Our train trip to CSMT (nah, VT) is due. I remember meeting your parents since both were in Aero, now both have switched depts. Pls don't store nails and take weekly baths atleast. Let's ace it in the west coast! Syntax err maaf karden a & keep that weird-ass laugh forever. Your bhakt, Bisso!

Ayush Dubey : Yo coding God! Tere Solidworks help ke liye thanks bolna tha. Adviiity project me select ho gaya tha usse (though dicthed it as usual). Thanks for the freshie tut solutions, and branch change nahi karta toh aur bhi fayda deta aero ko yaar. Being so down to earth in spite of being such an achiever is what makes you unique. (I do have a sensational voice recording of you from first year, so you may have to help me in the future too). All the best!

Tanya Gupta : Hi you 😊 Its been a rocky road to where we are now, but I will always have fond memories of our labs, night outs, you always wearing that adidas jacket, me getting angry at you for opening the cab door for me and talking for hours in front of the chocolate room. I remember you sharing research papers on a certain topic 😊 and I thought 'well, only an engineer can do this.' I was wrong, it is definitely only you who could have done that. It is always invigorating having deep discussions with you, because I am forced to take pauses, think, and rethink every argument I make and have to be ready to defend them. Thanks for making me a better person than I was. Wish you all the best for your future. ❤️

E Aakash : One of the most inspiring senior and ofc, God Coder of the insti. Thank you for patiently answering all my doubts (from coding to life questions). Please ham jaise n00bs ke liye blogs likha karo, kuch seekh lenge... All the best for all your endeavors! I hope you will remain in touch (and continue to answer my n00b questions)

Yashvardhan Didwania : Patil bhaii, kya likhu mai ab tere baare me. When we first met at Cheeku's room discussing what iitbapp should be , i thought to myself ki abhi isko Django seekhne do uske baad app start krenge :P. Could I be more wrong? Apart from almost single handedly building InstiApp, tune insti life ke har aspect me machaya haii. Life ke baare me kaafi baate ki hai humne jo mai yaha nahi likh sakta :P Keep thinking in weird ways :P You've been an inspiration in many ways, keep having fun and making the most of life. Milte to hum rahenge hi ♥

Debanjali Chatterjee : Hey, Varun. I got to know you in 6th sem, most importantly on Prom night 2019, when you, Abhinav and I founded "Let's Judge". You're a really cool person, fun to hang out with. Tumhare saath Starbucks and Atul Khatri ka standup live dekhna yaad rahega, that is one of the most memorable times I've spent with you. All the best for your future, I am sure that with your coding skills, you'll be very famous one day, then I can proudly say that I was your friend :D Do keep in touch!

Mrunmayi Mungekar : Aikkk! Can't believe I have got to bear you for a lot more time to come :-P Since EE to ES prep , to WnCC, to the IITB App to figuring out how a big big big coding geek you are, to pestering you with infi computer doubts. Never knew a random study partner is going to be such a great (albeit so irritating) friend :P From stupidest to the deepest of chats (mostly stupid :P), all in Marathi ofcourse!, to my bestest food buddy in the institute, to planning random details about grad life. You are probably one of the few people in the insti who have actually accepted my totes craziness, so maanla pahije tula! Well here is to loads of more eating and travelling and lukkha and hopefully studying too

Sanjay Khatri : Patil!!!!!! Insti ka best coder. Before most of the insti was even introduced to coding, you were well versed with it. Our wing "La La Land" reached Tokyo with you (and me :P) Maybe we did not meet much but our bonding has been great always since. First year me room me band karne ko maafi XD

Vardhil Mehta : Patil! Bhai, MD me apan mile the. Aur apne MD grp me tujhse jyada chilled out koi nahi tha. "Are chill maro sab. pain mat lo" ye tere se hi suneko milta tha. But jarurat padne pe kam bhi kar deta tha tu. Coding to fod hi deta h! Ese hi code karte rehna aur machate rehna.

Arsh Akhtar Ansari : Patil sir. You are the most talented developer I have ever seen. But usse zyaada you are much more complete as a human being. Tumhare bina apna tenure imagine bhi nahi kar sakta. You were immensely helpful but a much better friend. Kaun hi itne ghante debug karne baithta. It is really sad ki humlog post tenure utna nhi mile although baatein kaafi ki. Jis bhi uni mein jaoge macha dena and hume yaad rakhna ♥♥

Mrigank Mahajan : Yo Varun, we met through MI, and i am glad we did, you were a big reason why I had a great tenure, also for saving me in that ML course. I am going to miss the crazy and interesting conversations we used to have everytime we met. Just go easy, remember the handing over, ofcourse you don't. I really respect you for your coding. You have always been a very easy going person and I really like your frankness and genuineness. Always stay the same and stay in touch!

Himank Jain : Broo I don't know how my insti life would have been without you. Do I even be able to fix my windows problem alone xD? You have changed a lo(o)t from being a loner who always sits on his bed and does non-stop coding, no matter whatever is the time and day of the year. I still remember that kaand which happened at Kulkarni's "Kothi", what was that dude! (murjaya hua)! To the person who never came out of his room to the person who never came to his own room for days!, to the person who rarely talk to strangers to the person who always work with CC guys and who not! I wish our life fundae session would never stop and I am waiting for how you would go around accomplishing your THE-Mission. :P

Anirudh Mittal : Saste Mark Zuckerberg XD AAPke chakkar main career goal semesterly basis pe change ho rahe hain :P Please mere project pe kaam karlo (Agar SySAd ka kaam khatam hogaya ho toh) _/_ I still remeber this sophie doing an amazing job at teaching web dev during my freshie year summer. Chamak gaya tha yeh stud banda hain and now getting to actually know you, I am more confident than ever that you're going to do amazing stuff with your life. I really hope I will get a chance to work with you sometime <3
#GettinGoodAtSenti

Achin Parashar : God god god. The person whom I most admired in insti. Dukh rahega ki apan thoda pehle nahi mile, kaafi seekhne mila aapse. Bahut hi helpful ho aap, raat ko 2am SARCasm ko aap deploy nahi karte to pata nahi hamara kya hota. Saari websites to insti server pe shift karne wala nightout hamesha yaad rahega. Thanks for everything. Stay the same ;)
