If you could pack up a bunch of things from the institute to keep with you forever, what will those be?

"Solar Cooking Dank Buddij", EE mates, the scenic lakeside stretch and the carefreeness of insti life!

Yearbook  
2020

**Aryan Agal :** Tere liye jitna bolu utna Kam hai. Known you from 7th. From spending first year in Energy, tera wing was super fun, and ek sem toh kaafi zyaada maze kiye tere wing mein. Fir energy ke solar cooking buddij mile and we've done all kinds of crap, bas tune BC Karli xD. Then ITSP kiya ek summer. Next year we were co-cons in ERC, we had each other's backs. Bas 3rd year mein we both got busy, but sahi rha <3. We've shared a lot of interests, and it's been a privilege to be around you and discuss stuff with you. 4.2 mein overnight talks ne kaafi bigaad diya sleep sched XD. Wish we were in the same hostel, but iss case mein unfortunate rahe. Thanks for all the support through it all. Abhi tu PhD chala jayega and udhar bhi machayega, just like you've done through insti <3 Love you dude, met few people as smart and fun loving as you and I'm sure whatever you do you'll excel in it!

**Pranil Joshi :** The coolest maggu ever! I dare you to name one thing jis mein tune machaaya na ho :p Souvik ki class mein milne ke baad se we've only grown closer. In all this time, you've not changed what I love about you. You are extremely hard-working, because unlike literally everyone, you enjoy your work. But tu bakchodi bhi bahot karta hai, as if only you in the whole world gets 25 hours in a day. I can imagine that I've indirectly learnt a lot from you. West coast pe milte hain kabhi, Rick and Morty dekhte dekhte bubble tea piyenge XD

**Atri Dutta :** Less puns, more Beatles♥. Coolest elec guy ever. Keep running, 5k improve karle, maybe we'll run a marathon in US someday! All the best for your PhD, keep in touch man!

"The song is over, but the melody lingers on."

"Solar Cooking Dank Buddij", EE mates, the scenic lakeside stretch and the carefreeness of insti life!

Yearbook  
2020

**Satyaprajna Sarthak Sahoo :** Dude. First year met you as a mutual friend of our famous crackhead Aryan. Its funny because you were the eccentric one according to me, and i knew you would have life figured out. Fir hua Solar cooking, jisme maine cake banane se jyada bahut kuch seekha lol. ITSP was one of the best times of my insti life thanks to you. Bahut maje maare. Bahut ghoomte. Bahut bakchodi ki. Will miss out talks. This Holi was one of the best ones I've had man. Good luck to your future endeavours. Keep in touch. (Solar cooking buddij forever.)

**Shubham Punjabi :** Bhishma brooo. D2-T2 was indeed lit, but so was the ITSP summer in the institute, without Aryan and your help, probably nahi ho pata complete. You are like the most all-rounded person I have ever met, literally. From being DR 1 to being manager of ERC to having an undying enthusiasm in sports and fitness. Mood Indigo was fun because of all the silent disco we did all these years. US mein to aana hai yaar, east coast pe maze to Karne hai but wall street nahi bhai 😊. 10k, 21k sab karenge, and world to travel karna hi hai!!

**Akash Sharma :** Yrr bhishma pada de naa kal pkka lag jaane hai mere ...this is how my freshie year went ...lunch at your home at freshie year diwali is my fondest memory with you ... Thoda interaction aur hona chahiye tha per jitta hai khaafi tha 😞 Good byee ...machate rehna 😊

**Kumaresh Ramesh :** You're the hero our department needed but didn't deserve :( The design-builder and debate will remain my most cherished memories, thanks to you. We didn't interact as much as I would have liked to - different hostels and departments. Nevertheless, it has always been fun talking to you and learning from your insights. Irrespective of what we're discussing you'd always be the most curious person in the room. You embody a lot of what any student in an Indian Institute of TECHNOLOGY should aspire to achieve. PhD ka pata nahi but New York to aana hai ek baar, let's hope I make it :P PS: Now that you are graduating anyway, those red t-shirts were \*slightly\* better than what I gave you credit for.

"The song is over, but the melody lingers on."

Yearbook  
2020

**Yash Samriya** : Probably the coolest maggu of the batch! :p Your hardworking nature and excitement towards doing cool stuff and research are awe-inspiring! You were one of the coolest members of the council! From our academic discussions in the first year to being gym buddies last year, we have shared a lot! :)

**Anant Taraniya** : I wish they restart the leftover sem for 5-6 days and we'll have that long planned squash match. Itni arbit aur bakchod bato mei bhi ek insaan kitna inspire kr skta hai apni existence se logo ko, prime example. Will miss reading and deducing those quotes on your wall. DIC project mei tere andar ka ismart boi sadiyon tak yaado mei zinda rahega

**Apoorv Srivastava** : Apne ko milne me thoda late ho gya, despite being in same hostel pr koi nhi. GRE TOEFL k fundae dene k liye thanks. Apna mess ka last discussion to shayad "Gregory Alan Isakov" ka tha, aage aur bhi bhut kch chizen discuss karenge. Paryatan to jarur karenge. Aur kabhi khelne aur running k liye bhi challenge. touch me to rhunga hi mai (:p). Kch din phle website dekha tera, congrats on your next level achievements (\_^\_). machate rho. :D

**Kumar Ashutosh** : Lucky to have worked together with you. Last two sems were fun thinking out loud. Big board, late night brain storming and cool ideas that you came up with. Have fun with your PhD. I am sure you will enjoy every "state" you are in and you will get high "rewards" in all your "transitions". Keep pushing the "bounds".

"The song is over, but the melody lingers on."

**Sarthak Consul :** To a fellow glitch-in-the-matrix: You're the coolest dude ever! One of the best things of BC'ing was that I got to meet you! You've been a great friend and a constant source of inspiration throughout these 3 years. Cheers to our continued partnership in almost every project and the many all-nighters we spent laughing instead of working! Mumbai ka Pizza Hut toh loot liya, abh Pratil ke saath east coast ke pizzerias pe raid maarte hai saath me! All the best at Princeton! Hope we can collaborate in the future :P

**Vatsal Khetan :** Bhai we didn't talk for a major portion of our insti life. I am still sorry for things I said that might have hurt you. All those memories that we have of going to your place and having lunch, I remember your mom said fir aana bacchon khane, I hope that happens someday. I remember the fun we had watching cringy videos of golmaal movies. I wish I could have spent more time with you and learn from you dedication, discipline which I badly needed. And also ramashray ka dosa ab tak ka one of the best dosas me se hai.

**Vineet Kotariya :** Baakio ka toh pata nahi par mere liye tu hamesha Beema hi rahega XD.. Apne machines aur analog lab ke kaarname hamesha yaad rahenge especially voh bandar vaala incident! Mera bina tu saare labs mai kya karta :p H3 ke mess mai apne daily chats, baith ke poori insti ki udaana yaad rahega. kitne maze kiye yaar. Ab toh US jaa raha hai, par jab vaapis aa jaye, I hope ki tu local mai fir se voh chappal pehen ke nahi chadega XD.. Acads mai itna god upar se ERC aur SMP, kitna machaya bhai! Fir bhi aaj tak treat ka wait kar raha hu. Life mai aise hi machate rehna aur bahar jaake hume bhoor mat jaana! See you soon!

"Solar Cooking Dank Buddij", EE mates, the scenic lakeside stretch and the carefreeness of insti life!

Yearbook  
2020

**Deepak Gopalan** : EDL machaya hamne saath mai! DPAC v2.0 kaafi sahi tha: infi soldering, PCB design, late-night reports and PPTs, and group presentations... EDL wouldn't have been fun without you and KP! Ph.D. ke time lets design DPAC v3.0, the most advanced Hybrid computer to run ML algorithms lol. We got kaafi close since then, you have seen the major brunt of my Ph.D. apping anxiety. I'm glad that both of us got into top programs, it's just unfortunate that its different universities. Fir bhi, I expect to meet you regularly in the states and crib about the progress of our respective PhDs and advisors lol. See you soon!

**Garvit Goyal** : The most hard-working "dude" I've ever seen. Bro, you've inspired many souls in insti with your unending passion and commitment to research, and I'm sure you'll continue to do so, perhaps on a much larger scale. Keep up the excellent work, and good luck with your research career. Keep in touch, man!

**Puneet Kaur** : Hey Bhishma! 😊 Convener tenure was fun be ♥️ bahut gaali khaayi hai xD and bahut masti bhi kari. I haven't been able to change my sleep schedule abhi tak and hopefully aage bhi yahi chal jaayega kaise toh 🤔 totally amazed till date with your branch change and how you've managed to be friends with Aryan since 1672 years 🤔🤔 bahut machaya hai yaar tune throughout. Ab toh handing over treat do 🤔🤔. I hope you keep doing all that you love (sar ke upar se jaata hai mere xD) and stay in touch 😊♥️

**Rajarshi Saha** : "Started as conveners now we here" XD. From our convener tenure, filled with inane amounts of b\*kch\*di and pains, emerged a bond that is one of the things I cherish in my life. I somehow always ran into you in the H3 mess, always leading to a 30 min gossip session. Sometimes, it became on of those rare serious sessions where we talked about our future paths, in which your completely rational and no BS mode always grounded me and reinforced my drive to pursue what I wanted to do. You are one of the few people in insti whom I looked up to for many reasons, all of which can elegantly be summed up by "Machau". Still plan on taking up on the beer session we planned last summer :P Cheers dude <3

**Yashvardhan Didwania :** Bhishma broo, it's been so much fun hanging out with you this last year. I wish we'd talked so much earlier. You are the coolest maggu i've known. Not even a proper maggu since you are so good at everything you do. I learnt so much from you during our talks , walking with our bicycles after lectures. Your time management skills are just insaane, I learnt from you that there's always enough time for things one wants to do. Trains me almost 35 hours kya random bakar ki. Babaji ka prasad lene ka time ab tera hai lol. Tu gym ke liye puchta tha isliye mai aa bhi jata tha regularly :P Thank you for being a good influence <3 Keep alive your quest for knowledge and ek din tu zaroor Nobel jeetega..us din hume yaad rakhna :)

**Owais Chunawala :** Bhai, I don't think Insti mein tere se zyaada kisine machaya hoga. I think, you are the defination of "Machana". I'm honoured to know you and having a chance to work with you during our ERC tenure. Your grit and work ethic is something that I'll always be in awe off. Thank you for carrying the ERC mantle forward with Abbey, kaafi machaya tumne. We had few conversations, but those were very deep and meaningful. We should have more of these in future if possible. I hope to see you back in India in future. I feel our country and the world needs more smart people like you. All the best! <3

**Sanidhya Garg :** Yo Bhishma, not gonna lie one of the smartest, smart working person I've met. You may be one of the few BC junta jiske Elec mei aane se mujhe khushi hui hogi 😊. Baki we've had our share of fun during our convenor tenure. My special dance moves are a proof of that 😊 Baki infi thnx for all the acad help u gave me. Tallur ki reports chapna mera(hopefully he ain't reading this wrna...) to all the notes and solutions. Baki cheers to your journey ahead. I know you'll have the same impression in America as well. Hopefully we'll be in touch. Cheers 🍷🍷

**Premanshu Kumar Singh** : Bhushma boi, the most machau maxx, fitness freak maxx gujju(sorry kucchi :P) i have ever met. I still remember u were the first one I talked to when u came to my room on day 1 to ask for hallie's office in ur SoBoish(:p) accent. woh ED nightouts, endsems night canteen jana, #iitbmasti pe bitching. Bc kaam chai pee ab and coffee chatna bhi band kar :P. Coldplay concert was epic, bc bhut fight maari thi uske liye, maddu mess bhi 1st time gye the us din. Pure 4 saal tera bhut rr bhi suna hai(last ek sem meh thoda zyada :p). Bc dusro ko bhi tareef karne diya kar, ur coming to my room after workout and mirror meh dekh k bolna mast cuts ban gye yaar was epic. solar cooking buddij will be immortal.

**Arush Gupta** : Yo bhai! You're one of the most humble people in insti that I've met. All I can say right now is that I would like this to be the start of a friendship since I haven't actually ever been able to spend that much time with you. I'm writing this to reconfirm our pact of meeting up at Princeton :D xD Ek na ek baar toh pakka; we'll keep in touch over video calls till then and beyond!

**Shailendra Kumar Soni** : Bhisma bhaiya kem cho! bro you have done and accomplished so much in these 4 years, kaise katr lete ho ye sab? first year m to khub enjoy kiya apni wing ne, those are unforgettable moments. Second year k baad sab busy hoe lag gaye the lekin jab bhi free hote random discussion hote rahte maje kare khub apan log ne. Aur dude ghar p jo dawat di thi tune abhi bhi yaad hai 😊. kaafi hardworking aur sincere hai tu apne career k liye. Bas aise hi machate raho life m. Milte rahenge jab kabhi bhi mauka milega. 😊

Yearbook  
2020

**Abbey Zachariah George :** You are the most hard-working and dedicated guy I have ever met. Time management ke tohde fundae idhar bhi dedo sir. It was a fantastic experience to work with you as my Co-Manager. We have had our ups and downs. I seriously can't thank you enough to tolerate my arrogance throughout our tenure. I am happy you did or I would have lost an amazing partner. You taught me the real strength of working in a team, and that is a lesson I will carry to my grave. Please continue to be awesome (need not mention that). I am confident that people will be both thrilled and craving to work under you Prof (soon to be). All the best and stay in touch! :)

**Parthasarathi Khirwadkar :** Yo Bhishma! (aka Bheema 😊) Kitna machate he tu bhai! You make it look like being DR-1 is too easy 😊. You excel in academics and research without compromising on your extracurriculars. It has been amazing working with you on projects! You are so enthusiastic and dedicated to your work that sometimes it is difficult to keep up with your energy. Along with acads, you have also been a awesome Manager of ERC and a mentor. I have a lot to learn about time management from you! Aside from all this, I still remember our trips to Shiru Cafe after or in the middle of lectures 😊. Keep up the dedication. I am sure you will be one of the top PhD scholars at Princeton! I look forward to meeting you in U

**Anirudh Mittal :** One of the most important lesson I got from insti was from the mini fight I had with you after XLR8 (Abbey OP as he is not on YB). i would have saved couple of friendships if that had happened sooner. Will be grateful for it always! <3 As Disip once said," Bhishma sab log ko combined karlo usse zyaada successful hoga" you will surely do kick-ass stuff. Princeton main ERC start kardena and CPI itne high mat lana XD 10 years downn the line after getting bunch of patents and teaching at an Ivy League and feel like remembering college, do remeber that Bhishma 2020 was super hardworking, smart and the best instagrammer! \m/ #SuckAtSentiButHeckyeah

Yearbook  
**2020**

**Aniket Bhatia :** Yo Bhishma!! You're seriously one amazing person! Your enthu in doing stuff is extremely laudable (thoda sa enthu yaha bhi de de ;))!! Meeting in H3 mess kinda became a daily thing. Also, the way you'd so causally and yet so inconspicuously (to the profs :P) walk in 'every' class with that Shiru ki coffee, was absolutely amazing, cause when I tried it Jayanta ne pakad liya xD. I seriously wish you all the best for everything and aise hee machate rehna!! :D
