Keshav Janyani : You are a sweet person Sai. One of the most hardworking and punctual person I have ever met and I hope to learn that from you. I think you are the reason I get through most of my exams :p don't stop playing video games and watching anime and I know you will achieve great things in life

Kartik Patekar : Yo ψ! From being 2 introverted individuals to the best of friends, we have come a long way in last 3 years. Being with you over all these years, I wish I could have developed the habit of reaching 20 mins early to a class or being punctual about an assignment. You are just too stubborn about doing things the right way. Well, I am thankful to you for being so diligent, IITB would have been an Hellish place without your notes, and you:P. You might be shy in a group, but you are one of the best person to talk in private (Never ever tell anyone about my crushes). With God's grace, you will soon get to meet the BlackPink members xD! If you even run out of names for discoveries, I nominate mine!

Aman Sharma : Hey Sai! It's been so great knowing you, such a solid guy with impeccable believes. Haha yes, Kill-Bill 2 still remains, someday! I'll be looking forward to seeing you soon wherever that maybe:D

Mrigank Ashesh : Saipriya aka Saiborg. EP wouldn't have been possible without you. Trust me a lot of students missed the classes just because they were sure that Sai gaya hoga and notes le lenge. Because of all those notes I had the liberty to explore other things. It wouldn't have been possible without you. I definitely miss our GYROS group discussions. They were indeed fun. Sorry, for comparing you to a computer program.😂 Stay connected Sai. All the best for your future.

Himani Gangurde : Hey Sai! First of all, thanks a lot for all the notes 😊 Without a doubt, you're one of the most sweet and modest people I've met! Although we became friends quite late, it was always nice interacting with you in the department 😊 All the best for the future ahead!

Adane Sahil Ravindra : Saaaiiborg!! Haha, thanks for waiting xD ITSP was a lot of fun, part of it was getting to know you. You are always interested in listening to people and that is one of the best qualities about you. Never lose that. Your palm literally has the Greek alphabet Psi on it. You were basically born to pursue Quantum Physics, but I am sure you will do great at whatever you choose to do. Just keep the phone aside while eating, finish it and get back to eating ;) Trust me, you will enjoy more and save time. Good luck for your future!

Abhisek Sahu : Bhaina. Any attempt of trying to pen down what you mean to me will only belittle all that you have done for me to make my undergraduate life memorable. I am also not saying goodbye because I know we will meet many more times in the future, as friends, as collaborators or maybe even critiques. And all those experiences are gonna be great. Stay the diligent yet messy, sensitive yet tough and caring, loving human that you are. I know you are set for a lifelong path of success 😊 You ARE a brother to me. Period.

Edwin Saji Uthuppan : You are one of my most successful pet projects. Over the years I have come across people who are a bit reserved: I bring out whats inside them. People might think you are an angel but i know you for the demon you are, fellow halo lover(you are one of the few people I could talk about games like this man). I love talking to you man!

Sagar Kumar Seth : Yo Psi ! You are one of the most humble person I have met. Easily approachable and a wonderful friend. I guess you were my first friend in Bosonic gang. You have big physique but are soften spoken and tooo apologetic, I guess should change your nickname to Professor Hulk. After all first member of Bosonic gang with a google scholar page. You have a caring personality and have been a life-saver on multiple occasions ! Our love for anime and video games has brought us closer. Waiting to finish Hitman together. All the group outings and Berlin/Prague trip were super fun with you. Thank you for bearing with me asking you to click so many photos ! Stay in touch ! All the best for future endeavors

Sumukh Vaidya : Hey Saipriya! You're among the juniors that I got to interact more with, and it was amazing to see your dedication and hard work really. Sorry for any unwanted funda sessions really :P You've already got an amazing track record in your research, and I hope you continue this great journey! All the very best to you !!!

Sowmya Ravichandran : Heyy! You're one of the politest and nicest people I know! It was nice knowing you and I had fun with you guys, though I do wish we had the chance to get to know each other more. All the best for your future and do stay in touch!

Sigireddi Yamuna Devi : Hey!! I guess you are the calmest guy in the biotech team :P. It was fun working with you for CSI and I know it was very annoying with us in the co-ordie interviews. But hey, it was entertaining too. All the best for your future.

Sachin Tak : From XLR8 to IC.... We had a long journey and I hope we meet again in our Lifetime.

Luv Nainwal : Yo Satya Boi! EP kya mast sambhala tenure me. Happy to know a dedicated person but itna enthu ? xD Thoda time nikal lete Sir milne ke liye. I actually remember asking you for a trip and you said is din chal sakta hun. That made my day leaving aside you couldn't make it, my bad. Just stay the awesome person you are! Good Luck! :D

Bohra Ankit Narendra : The most silent, shy, innocent person i guess i know in insti. Our interactions were few during the tenure but whenever we met, it was nice. You speak less but you speak very logical stuff. All the Best for future!
