

JOSHI ANANT AVINASH

Mechanical Engineering

Yearbook
2020

Sarthak Nijhawan : I just wish I'd interacted and seen more of you in these years. Never had such funny in-depth discussions on so many frivolous topics with anyone before. But, srsly, had always been a pleasure discussing some serious stuff with you. Learnt a great deal in the process. Do keep up with your maths frenzy. I'm a sucker for such peeps, you see. I have your book, we'll still have to meet someday before you depart for me to return that to you :P. Try not losing out on that casual workout look of yours in the US - it suits you. Wish you all the best for your career. Pretty sure you're gonna make a phenomenal researcher (as opposed to as an instructor :P). Stay in touch! Cheers!

Yash Shrivardhankar : Anant dada Joshi! From your dogpiles in SATlab to see you getting in shape, it was a pleasure to know you. Thanks for all the funde and watercooler talks! Also majorly to shape my thinking process as to think fundamentally, which you are amazing at! Keep laughing your way and stay in touch!
