Shaifali Shaifali : Heyy Shubh, never expected a post for me from your side but I am really happy to have one. I don't know if I have thanked you for helping me out in Fortran but this is the right time to do it. Thanks for not only helping me with the course but for being someone whom I can give a part of credit to for developing my interest in programming. You are an amazing combination of brilliance, fun, creativity (your memes during farewell were fab) and helping nature. You possess a set of qualities that very rare people do. You are a genius to all of us and may you achieve great heights of success and lead a reallyyy happy life. Best wishes from my side. 🍀🍀🍀

Aprajita Shukla : Thankyou, Shubh! 😊 This was the kind of unexpected that pops out memories you didn't know you had! I remember the time I forgot my specs in the lab, and by the time I realised it the lab was already closed. And you called our lab teacher to check whether she would lend us the keys to collect my specs, and somehow you did manage to get them back! Best wishes for your future! Take care!

Ria Miglani : Are Fortran Master! Kuch gossip de na? Hairani iss baat ki hoti thi ki tujhe organic me full marks bhi kam lagte the? Matlab bro mai 2 baar pass ho jau utne me 😭 Par thank god tu typical topper types nahi hai! You're so much fun! Always up for random logo aur mere papa ki bitching 🤣 and thankyou Fortran padhane ke liye. AKD ki class wali bakchodi bohot yaad aaegi 😭 Aur freshers wali bakchodi bhi 🤣 I remember when a certain person was dancing and you turned to me and said “ Kitna junglee naachti hai bhai yeh” 🤣🤣 Videsh jaa ke bhul mat jana aur ankita ke saath shaadi ho jab toh invitation bhej dena! ♥

Harshita Khurana : Hi Shubh!! Thank you for helping me out in every course of first year. You are certainly one of the most hard working and passionate persons I have met in IITB. We used to interact quite much in our first year, but I really don't know what exactly happened in second year. Nevertheless, I wish you all the success for your future endeavours. You are a genius, and I really hope to see you achieving great heights. Future is yours!! Just keep going ahead.
