Sumukh Vaidya : It has been such a long and eventful journey with you dude. From the wild lunches at catalyser to the lovely time spent at insti, you've been a constant great friend and companion. Kaafi bakar ki hai apan ne saath me, aur age bhi karte rahenge. Stay the amazing, sweet and nice person you are, and do amazing ahead!! <3

Kushagra Kacholia : From cracking jokes on people who take up a corporate job to becoming a part of the joke itself, you've come forward a pretty long way :P But seriously, you're an amazing human, always ready to help others in whatever way possible, while being dedicated and focused on your goals with the utmost sincerity. Wished we could have spent more time together and hope we will sometime in the future! All the best for everything that is to come!!

Rahul Agrawal : Thada bro! Kafi stud ho aap yaar.. Kafi fundae diye hai aapne idhar udhar ke fluids wale courses ke :P. Jaldi se naukri chhod ke US aa jana, NYC trip karni hai dobara apne ko. (that trip is still one the best weekends I spent in insti life.) Ghum gaye the jab 2 baar NYC me, vo bhi raat ko bina sim card ke. Imao!! Bhagwan ne chaha to kisi din same project pe kaam krenge :P. Stay in touch bro :D All the best :D.

Apurv Tiwari : Shaaaaaaanu! Aero walon se zyada aero enthu rakhne wala banda, most importantly turbomachinery <3 That damn smile, and always ready for some bakchodi, hamesha maza aata hai tumse milke. 1000 headshots meri taraf se tumhein :P

Kushal Agarwal : Thada! Apse jitna bhi baat kiya, apko dekh ke seekhne ko hi mila hai humesha. Roll baap hoke bhi treat nahi di aapne bas us baat ka dukh rahega. All the best!

Aniruddha Ravindra Ranade : Mech dept ka mentor hein bhai tu - agar tu endsem ke pehle material share nahi karta, toh pain ho jata. You are one of those few people, who have held together mech junta - from dept photo shoots to times of crisis like Machine Design :p It is no surprise that everyone likes you and anyone can freely discuss anything with you. The best thing about you is the smile you carry around - make sure you always remain like this - a people person - like a beacon on a lighthouse!

Patel Sayan : Thanks for the coat !!!

Nakul D Ghatge : That's where the trouble begins. That smile, that damn smile. First year se inhi kahaaniyan suni DC (the real one) and Kabra se, without even interacting you felt to be one of us. From arranging dept trips to useless activities, you were one of the people who genuinely cared for our dept. What can I say more, we both shared the torture of that Vedula course xD and I have to admit that your last minute notes shared on mech junta helped most of us cleared the exams (Ashish and samarth will back this). Also tu ni hota to ye indori aur jaipuri pakka ladte :p People should learn man-management techniques from you. That being said, have a happy life ahead and may you always be the one you have always been <3

Yearbook
2020

Pranav Thakkar : We've met at so many places and have so many common friends that I cannot believe we haven't hung out more, even when we lived so close to each other this year xD man our last sem got taken away from us warna hum pakka bohot chill karte. You're super sweet and apparently a Mech god, and you sing and play the uke really well, I can't believe I haven't heard you more. I also have added respect for aero propulsion enthu junta XD I hope we get a week or so when we're back and then we can chill without any stress :) stay the same, buddy!

Gali Meghana : Even though we've actually met and talked a handful of times, you're the sweetest and the most polite person I've come across in the institute. We've had more than few failed plans to hangout but it's always good to hope we can fulfill them soon. Just an advice, cats will betray you and they mostly suck, so run away from them not towards :) Lots of love, Meghana

Shreya Sethi : Just 700 characters, that is unfair. Starting with cat vaccinations to date we have come a long way. "All kittens are cute in this world"(period). But, then we added dogs, birds and squirrels to the list too. You are such a lark and with the lamest jokes at the flick of your finger, I am going to miss all that. Your aerospace jargon now mixed with SCo2 is slick with oil now, waiting to see the academic twist in the tale coz I know you are one person who is not a jack of all traits but king of them all. I am going miss :(making random plans, Gosh! those middle of the week party plans (empty sobo!) were the best. But, there is still a long bucket list to check off with you in life. <3.

Yash T Rajan : First of all, continuing the tradition, #TFEGodHotaHai <3. Jab se insti mein research projects shuru kiye the, the one thing which I always wanted to do was to partner up with someone, and I am so lucky to have got the opportunity to work with you. Aapka apke kaam ke liye dedication aur persistence alag level par hai, having experienced that first hand. Uske alaawa bhi as a senior, infi help kari hai aapne and I will always be thankful for that. But this surely does not mean ki aage peechcha chhodne waala aapka :p The work we are doing together, has brought us a lot closer and I am sure ki results achche hi aayenge. All the very best for your future, pakka machaaoge <3

Anmol Gupta : Thada my boy! That pseudo-doppelganger phase in freshie year was fun XD. I still remember being so keen to meet you when I came here. I think we met in the old SAC TT room and I was almost half-disappointed we didn't look that alike hehe :3 Were on and off touch in the years to come, but I'm happy that H18 happened and we again got to bond properly. Discovering your penchant and talent for poetry was truly surprising and pleasing to me :) I still envy your H-18 window, it was beautiful! Let's hope we meet soon, and all the best for your future!

Shashank Sarvan : Thada, I remember meeting you in freshman year at H15 while shooting some hoops. At that point I just knew you as Anish's roommate. Fastforward to times in H4 and you were the pussy magnet of the hostel (so many fricking cats in your room :P) I remember a lot of tech stuff we did- the robotics GC and that KDoM project but I think we need to replace that with more party scenes. You were a great support during the placement season and I was so thankful we were neighbours at H18. Treats pending :) Take care!

Athul Arun Nambolan : Thada the TFE god in my circles, itna turbo-machinery enthu kaise bhai. You were the psuedo aero-modelling convenor we always had. Sometimes even more enthusiastic. Thanks for those placement vaale last minute GDs nahi tho poora hi hag ke aata mein !

Yearbook
2020

Gaurav Chaudhari : Teja ke sath vapas Lakshmi jate hai. Treat is on me.

Bhatt Maulik Chunilal : Yo Thada, you have been an extremely good senior. From guiding me throughout my secy tenure to giving all the academic and life related fundes when required, you have helped me a lot. Will never forget the efforts that we put in making that Van de graph generator XDD. Keep the aero enthu alive in yourself <3 and keep giving me fundes :P. Stay in touch

Karan Kothadiya : For he's a jolly good fellow, which nobody can deny! :D We'd barely known each other before the final year but there's an ease about you that makes me feel so comfortable talking to you bhai. Easily one of the most polite persons I've known. Wish I'd gotten to know you sooner man. All the best Thada! Love, K

R Aditya Narayan : Always a nice chat when we meet. You seem like a stand up guy. Was fun listening to your stories back in the day :)). Best of luck for the future

Bakhshish Preet Singh : Thada you were always the DGSec we needed but didnt deserve XD. One of the rare people I have met jinhe legit concern hai department and academics ke lie. I love apne Professors ki bitching ke sessions and random gossips. Jaha bhi jaaega machaaega hi tu but jaldi se jaldi PhD ke lie aa jaana, bina research related bitching ke na ho paaega PhD.

Shubham Goyal : The prime example when people say ki research me enthu kise he to me tera name leta hu thada :D there are only few jinko itna enthu he particular fields me , baki apan classes se zyada mess ki table par mile he n pata nahi kya discuss krte the xD , and yaa apan 3-4 hi jo shayad DD whatsapp group ko zinda rkhte he and rkhte rhenge :p humara pseudo CR + h18 Gsec _^_

Satyam Mohla : Thada! I really regret we didn't meet and our interaction has been far limited to just dinner tables in H18 but man youre research interest for Mechanical #Turbomachines is just so inspiring. You are an awesome guy and I am glad our meet is better late than never ! Stay in touch man :D

Rohan Pathak : Thaaaada. Bhai kitna mast hai. Mai toh tujhse mila hi last year mein hu :(Nonetheless mile toh sahi :) Kya bolta hai yaar tu, gyaan ke samay gyaan pelne mein master, hugne ke samay hugne mein master haha But uss din jyada hug diya tha (IYKWIM) haha Bahut maza aata tere saath 😊 Aise hi milte hugte rahenge :')
