Adhishree Apte : Although haven't talked in almost 2 years but here we go. Absolutely liked the way you saw physics everywhere and quizzed us on simple everyday things. Loved to have 'let's learn together' sessions with you. Hope you do remember. Bye

Anant Taraniya : When we bromance, people take us as gay, but that's okay! Our range can make people go from fuckin' awesome to kya BT log hai in no time. We dreamt and grew up and fucked up and struggled and achieved under the love of our insti family, our lab. I am glad we made through that AUV recruitment. Hope the post would justify the first line. MI 2k18 is indeed the craziest, wildest memory of insti. Pyar hai bhai tu.

Edwin Saji Uthuppan : You know, I think you are fucking cool because you want something and then you go and get it... Nothing can stop you. Plus you're the only one shorter than me, hahah!

Drish Mahnot : Bhai end tak pata hi nahi chala tha tu H6 ka tha. Kidhar chupa tha??? Thank god Pundir introduced me to you, Sushi day se hi I've really liked your wholesome personality. God driving skills, sorry for having my (reasonable) doubts xD Kaafi acchi spontaneous trip thi, followed by many in H6 :P Always been fun, I love how ultra chilled you are man. El Classico days ho nahi paaye sadly, but koi na, I'm very happy with the limited time we had <3

Saipriya Satyajit : Ananay bro!! Ok two things, first I can clearly hear you replying Sai bro!! in your voice and second I remember the time when you taught us how to pronounce your name 😂😂. I think you saved me or Sahu as EP boy 509 on your phone cause that was the opposite of your room 905 😂. Speaking of which, you shouldn't have moved there in the first place, that would have gotten us in the same hostel. Anyway, I am really glad that I got to know you, you are one of the coolest person I have ever known. I think I have said it many times but haven't nearly stressed enough that it is one of your saying that I try to stick to always when I am seeing life too closely. Love you bro♥. Hopefully see you soon♥

Mrigank Ashesh : Ananay bhai I still admire ki tereko itna kaise pata hai har cheez ke baare main. A significant portion of general awareness about things happened because of you. I am happy I did the Image Processing and ML courses with you. We have exchanged a lot of ideas and our conversations have always been fruitful to me. Looking forward for more such conversations with you hopefully in Bangalore.👍

Kale Ninad Naresh : Bro... me tera fan hun yr tbh. the way u think, the way u look at life, ur perspective broo kafi awesome hai. Ham hardly mile hai last year but jabhi mile hai next 1-2 din mere tune batayi huyi chije samjhne me hi jata tha. NIOT me next level maje kiye the hamne. Train wala dance badme ham chennai ghumne gaye the. One of my best memories i will say. Bro Me kabhi ye bola nahi but I missed u in lab. I wish fourth year me tu bhi hota lab me. idk tujhe yaad hai ya nahi but tune third year me bataya tha tujhe team kaise chalani hai and bro us din toh me pagal ho gaya tha tera though process dekhe. I wish aur time spend karte ham saath me insti me banglore me toh karenge hi. Love u man..

Sudarsanan Rajasekaran : Yo nene. Kya mast insaan hai tu. Always loved your tech + philosophy mixed talks. Tere aane par hi mahaul pura lively ho jata hai. I first met you in the NSS meet.. Mast fun loving tech nerd lagta tha tab.. Didn't know how you turned so caring, responsible, philosophical... Still remember our first conversation on being extrovert and expressing opinions.. and from there infi maze kiye team mein and all those long meets and debates.. Itne pressure mein bhi always smiling and laughing kaise rahta hai.. All the best man.. aage bhi machate rahna.. Really fortunate for knowing you and for being able to spend the few years we had in insti... Bhul mat jaana humein..

Abhisek Sahu : A NANA Y. Tu lajawab hai. Full of energy and enthusiasm you are always fun to talk to and you bedazzle me with new perspectives. You really know how to live a life man, and you have taught me so many things (ykwim😄). It's a shame our hostels got separated in second year..I wish we could have more 3AM conversations where we would pretend to be drunk. on just water😂. Cheers to the coolest CR. And all the best for your future. ☺

Athul Arun Nambolan : Yo Ananay ! you where one of the best junior members to work with at AUV. Always loved your questions and your style of working. Good to know you continued for a long time in team and also didn't forget to explore other things. All the best, will remember your jokes and performances at team treats !

Adane Sahil Ravindra : My favorite memory of you is you joining me for Moral philo (not your course) because you were excited to learn something new. This small memory is a perfect example of how you are. Your enthusiasm and conscious effort towards making yourself better, and reaching your goals is a joy to observe and learn from. You inspire me and there is a lot of respect for you. The highlight of 6th sem will always be getting to know you. We haven't been in touch as much as I would have liked after that, but it's okay. I guess the barrier goes both ways. But, I don't think the discussions wouldn't be meaningful without that so we should bring it down #unfiltered xD. And yes, it will never be goodbye with you

Shanya Anand : The Dude, playing as the Dude, this guy is another Dude, Ananay ladies and gentlemen. Ananay I really admire your skill to deal with a difficult situation and I've learned a lot from you, a lot. Ananay you taught me to answer WHY before answering WHAT and that's the biggest take away for me. Dude kitne trips saath mey ki hai humne Ooty, Goa and surely more to come. aur haan maar le g*nd but you to bring a makeup kit for me because at least I want to look beautiful when you are trying to f*ck me XD.

Sanjoli Narang : Ananay! I especially remember the IIT Madras trip we had for NIOT. Results ke bad aapne sabko swimming pool me gira diya tha XD. These are some of the most beautiful memories I have with the AUV team. Reaching the peaks of the tech knowledge, while maintaining a family-like environment in lab. Aap jitne cool ho, utne hi talented bhi. Great to have known people like you! Hum bacho ko bhool mat jana.

Nirbhay Wadiwala : Never understood what goes on inside that little brain of yours. From critiquing everyone after getting super drunk in Goa to smoking up and starting wierd philosophical discussions cause you were taking a course with Jung. Though i hate to admit you did grow on me and I think I had the most fun I ever could travelling with you. I hope that no matter how many laptops i steal/ borrow / hide you will find the patience to deal with me. To the paragliding excursions and concerts yet to come

Sagar Kumar Seth : Yo Bro ! You are one of the coolest person I met in the institute. I appreciate your friendly attitude towards everyone. I like how you really try to understand others life stories ! Trip to Neel's house was super fun with you ! Thank you for driving us for so long and giving me my first car driving lesson. The passion with which you pursue things inspires me ! I remember you teaching us about OLEDs, how to fix phones, and change html codes to see passwords a day before the exam XD. The techie in you has really a great potential. Hope we meet someday again. Wish you great success for future bro !

Shubham Tiwari : We didn't meet much, but one thing that I will never forget about you would be that day during lab cleaning, when I was sorting all the phoenix connectors according to their sizes very very carefully. And then you told me, "Agar accuracy ghatake 95% karne se time addha ho raha hai to woh kar". This went too deep in me, to manage time and resources wisely if the little imperfection don't matter much. Although, I still struggle to follow it many times :P, but one day, for sure I will follow it fully. Baaki I really liked your approach to a problem, and the thinking process. I hope, aage bhi waise hi nay nay idea sochte rahoge and machate rahoge :)

Yash Shrivardhankar : Dayumm boi! One of the most interesting conversations i've had in insti life! You were that stranger whom one sees everyday walking down the street and fails to realize how cool it had been if you talked. Thodi aur frequently "maifil" jamaani chahiye thi bey! Kabhi ghoomne chalte hai yaar! It's good to know you! Stay in touch and All the best!

Aditya Biniwale : Nene! jiss first day wali excuse ki tu hamesha se baat karta aya hai, I dont even have a slightest memory of it (itna harami hu mei) xD. Apne views most of the time opposite ends pe rehethe the, and I guess I learned quite a lot from it. Tune bhi slowly flip side samjhne ka effort kiya n respect for that! Infi backchodi kiye hai, yaad rahega hamesha. N BC jitna Chennai mei Uber wale ne reject kiya tha utna toh insti ke auto wale tak nhi karte

Vatsal Srivastava : Your undying enthusiasm was and still is a huge source of inspiration. Thanks for going that extra mile every time I asked for your help, whether it was about physics courses or pieces of tech none of us have played with! Wish I could've spent more time on tech with ya, because the little times I had were all great learning experiences. Stay awesome! PS: Will always regret not having witnessed your walk out ;)

Nakul Rajesh Randad : Aapka "Bas aadhe ghante ka kaam hai, khatam karke treat chalte hai" bol bol kar nightout karwana kabhi nahi bhul sakte. U were a gr8 person to be around while working. Thought-process to already hatke hai hi and combining the philosophical touch makes it way different. Admire u a lot. Hame bhulna mat. N RCity treat was well deserved XD

Chaitanya Chandrashekhar Tate : Aapke philosophical baato k baare me kaafi suna hai par khud kaafi kam suni hai :) Zindagi me ek hi cheez mangi thi wo bhi dila nahi paaye aap xD chalo koi na bas bhul na jaana

Shaunak Vijaykumar Natarajan : Aap jo team mein aur especially hum freshies mein enthu badha te the aur post-meets meet etc se bachchon (hum) ki maddad karte the, man it goes a long way I think. I'm glad a chirpy character as yourself (who I'd like to liken myself too :)) was someone I could meet and learn from through the team, All the best to you for the future <3

Sumukh Vaidya : Too bad we didnt get to interact much really yar, you're a pretty chilled person to hang out with. I wish we'd gone on many more treks really, the first and last one was an amazing experience. trekking ka enthu banaye rakhna, maybe we might get another chance some day eh?

Akshat Raj Lad : Yo Ananay! Aapka perspective to look at things is amazing man. Different, but amazing. Aise hi critically analyze karke right decisions lete raho, and overall machate raho!

Advait Padaval : Sabse pehle toh define how long is 30 mins aapke liye!!! Sabse zyada excitement aap hi ke lab aane pe hota tha cuz it always was like storm after a lot silence! The way u use to look at probs was something else! I really look upto the way u worked and wanted us to, still remember bringing back M4 to life, u planned it in 3 days and I was like yaar agar mai inke half the enthusiasm se kaam karu toh it'll be great. Always keeping us full with thoughts during testing was how i learned the most in this team. We'll miss the NENE song on ur bday GPL ki yaad mai! And ya whenever u used to address as yeh toh apna baccha hai usme aapka aur anant ka maa aur baap wala conflict is still unsorted :p
