

TIRTHICK MAJUMDER

Chemistry

Yearbook
2020

Divya Maddu : Yea! First 1st to comment \((^u^)/ So yeah coming to senti, I'm really glad that I confronted you 3 years back bcos that's when I came to realized what you are in reality (even if partially) I really enjoyed ur company, be it last summers, or endsem prep, lab meetings, chess games or just our random mood swings; every facets of urs was interesting even if u were handful at times (pulling ur leg was my fav though) I wish in future more ppl see past ur intimidating / confusing aura, or u just mellow down a bit so as for ppl to realize how much of a fun & caring person u are. Life is too short, hence get involved with the crazy & stupid people around u. Its worth it! (&2000/- pls)

Rageshwari Marolika : Oyee Haggi. Stay safe, its rough time in Kolkata :(Abb toh janab California jaaenge (bade log). I can't say how happy I was to hear that news, finallyyy!!!! So its time to be happy and shrug off all the regrets and guilt. You always deserved better and so you got by your hardwork and dedication. I must say you are the Einstein of our Chemistry batch and your fundamentals can no more be clearer!! And don't worry sab sahi hoga, have faith. The small act of yours (if you remeber) recently before lockdown took my heart away and made my day. Thankyou for everything <3

Unmesh Raskar : Sir! Aasha karta hu ki Amphan mei aap udd nahi gaye; udne ki toh aadat thi isliye. We saw each other's worst and best sides throughout the 0.75 year. Remember the day I called you when locked inside the window? Hilarious! You are a true supporter of GoGreen and soon you will be living in your paradise in LA. Your knowledge of chemistry is deep and the way you spent entire day in the lab for 2 sems says a lot about commitment. Hope it stays the same and we get to see some new spectrometry high tech fundoo at the end of your PhD. You are among the few ones who met my imaginary friends XD Photography, Tabla, Bonjo(!) bajate rehna, find new people aur hume bhi Kabhi bulao amrika mei. Convo treat
