Hrushikesh Manoj Loya : Salle kute.. kitna idhar udhar haath maarta hai!! But you are one of the most hardworking and passionate people I've met in insti. Thanks for introducing me to Bayesian stuff, and sorry maine tera Qcomm kata... hahaha!! It was a great fun experience working with you on various projects! Life mai macha dena, aur jaldi academia aa jana, industry isn't meant for you :p

Krishna Subramani : Podu!! Kidhar chalu karu mai boss, listing everything here will take forever, to I'll string a few ones... Goa trip (apna random Panji tour to me missing the Bus :p) to apne discussions on all the issues surrounding ML/DL and grad school applications to Real Analysis (end-sem to phoda apan ne!), bhai bahut maje kiye hai tere saath! The fact that you have (almost) single handedly tackled an extremely challenging research problem from ground zero speaks volumes about your grit , determination and passion boss! Tu jo karne ko decide kare boss, wo tu ekdum jhakaas karega, wo I have full faith in :)

R Aditya Narayan : Bhai tu Ph.D. kyun nahi kar rha. From publishing a paper in a course project to arguing about society, it's been fun collaborating with you man. Tu bahut smart aur passionate hai. Hope you get into your senses and join us in the US for a Ph.D. Stay in touch :))

Satyam Mohla : My frieshie year wingie, BChanger to elec, to researching in DL and what not, we have shared our 5 years and seen much and discussed much, and our constant bakar never ends, like 5 mins ago when we were discussing what next , freshman year to phd and what not. I will miss you man, not having you around, not just walking around at nights and not just talking for hours about stuffs. no waiting talking for hours to we will def do lol. Take care man, we're def going to get better and stronger as our journey together begins
