If you could pack up a bunch of things from the institute to keep with you forever, what will those be?

Memories ! of all the random night outs, of all the philosophical debates, of all the crazy (some illegal stuff) ! So yeah mainly this yearbook.

Yearbook
2020

Kartik Patekar : Yo Sagar! The last two year had transformed you from a random funny guy to one of my closest friend. In the beginning, you had the reputation of being a ladies' man, which got confirmed pretty well. You did pull out an all-nighter to write an essay for some girl on a topic you had no idea about? JK. You always come forward to help your friends, without exception. You are a life-saver for me. I have had an amazing time at IITB thanks to you - You created the Bosonic Gang and introduced me to a savage-human:P. I have had a lot of fun with you from the birthday cake fights to our trek to the fall! You are always full of energy, and very smart in a your own way, just keep it up!

Pranav Sankhe : Sagar bete! I love your Forever Freshie wala nickname xD I met you for the first time during convener groundwork and it has been a pleasure since :) My Satlab experience was wonderful mainly because of you. I particularly remember we went to Hn once to have snacks at K3 and I made you try my favorite lichi flavored paperboat xD I like your soft-spoken voice and enthusiastic attitude. Later years mein jyada interaction hua nahi but I am sure we will always be in touch and catch-up whenever and wherever possible. Sail high on your dreams. Wishing you loads of luck!

Abhisek Sahu : Hello EPBoy16A. That was how I saved your name on my phonebook in freshie year😂, when you voluntarily came to talk to this shy person i.e me. This just goes on to show how friendly you are, someone who will go to any length to make those around him feel accepted, and comfortable(Yes, any lengths). Towards the end of third year I came to know you more as this multi-faceted and deep human being, thanks to all the late night chats, and also an adventure seeking soul as I saw on our very many outings. Panik mat hona, bas kalm rehna and goal maarte rehna😂.You have the soul of a happy quokka, just keep that alive😊. peace be with you ☺

2020

Saipriya Satyajit : 'Kartik jayega toh mai jaunga', 'kya tattti hai yaar', goalkeeper goal, these are few of the things that first come to mind when I start writing 🤔. And as for the rest of the things, I don't want to start an embarrassment war, which I am sure I will win 😊. Jokes aside, bro I will always remember the day of the BTP presentation and how things got complicated, and you stayed with me helping me out with the situation, that was really special to me and it means a lot♥. I am sure others will agree with me, you are a very caring person and you go out of your way sometimes to help people. I am very glad I got you as one of my closest friends♥. Damn the character limit 🙄.

Sukanya Kudva : Hi Seth (maybe I should start calling you that?), this yearbook exercise would be incomplete without you. From Satlab to Bosonic to BTP, you were there just everywhere. We started with we you convincing me for satlab treats and ended with me convincing for Bosonic dinners. Kitna kanjoos ban gaya tu.😂 You always had a flair for getting GPLed. From my bday to just every satlab occasion, tera GPL hona hi tha. We once had people teasing us then it was me teasing you. You are this crazy person who would go to any lengths to help people. Maybe that was one reason why we got to be so good friends. I hardly confide in people and you are one of few people I did open up to. Thanks for being there 😊

Aditya Patki : Yo Bangladeshi, dheere dheere tu H5 waalo me ghul mil hi gaya. Apne satlab waale aur H12 canteen waale kisse hamesha yaad aayenge. Aur kuch kare ya na kare but apne physics ka use lab assistant banne me zarur karna. Tujhe kitna bhi pareshan kiya ho tere baalo aur swag ko lekar but phir bhi stud launda toh tu hi hai :P. Hope aage ke kisse ab tak Hemu ke room pe discuss hue kisso se better hoga. Aage bhi aise hi machate rehna aur phirse milte hai ek pending treat ke liye. All the best!!

Riya Singh : Hi Sagar. Our friendship starts with the mini-project where you also made 45 slides presentation for my relief. We worked together on telescope payload and in elec subsystem. Time spent with you is always fun and mostly its me pulling your leg. As I have always told you that you are odd one out in the EP people and more like a mechie and I like this chill nature of yours. You are a very friendly person and sometimes I am jealous how easily and comfortably you are able to befriend people. I hope that you continue in physics unlike others, so that we can keep meeting in more conferences!!!

Yash Shrivardhankar : Sagar! Tere maze lena was my fondest memory in Advitya xD. You were always kind to me, I respect that! Lab se hostel jaate waqt ke acche discussions yaad rahenge. It was good to know your perspective. Stay in touch and All the best!

Aman Sharma : Yo Sagar! I guess you were one the first friends I made in the department. It's always fun to talk to you and be a part of your crazy wacky ideas, your spirit of adventure is something indeed! Hope to see you soon, at a different rooftop and a different drink, take care:)

Sowmya Ravichandran : Hey Sagar!! You are one of the most cheerful persons and it has always been fun working with you or hanging out with you. You are always up for trying out new things, like how I fooled you to drink that espresso :P But don't worry, I will keep up my promise of the icecream treat next time we catch up. And I'm sorry I didn't hang out with you guys more often. Stay in touch bro! Keep smiling and best of luck for your future <3

Adane Sahil Ravindra : Bro, tons of wonderful shared memories in Europe. Whenever I go back to relive those, you will be an important part of them. You are a fun guy to hangout with. Always excited to talk, and especially with strangers. We bickered a lot but worked decently well together and got it done (about a month ago xD). I never understood tujhe boating karne ka shauk kyu hai but thik hai, Zurich lake was peaceful. We basically planned trips and bought groceries during the week and drank a lot of coffee with our European buddies - Fulvio, Engin, Thomas, etc. Paris must be one hell of a story for you but be careful ahead ;) Good luck and take care!! We will catch up from time to time.

Arjun Rahar : Udupi boi! 1st yr memory kaafi lit hai tere saath waali. Diwali me tere room pr stay krna was such awesome time. I could study in those days just because of you. Tere saath patte khelna Or naman ke room pe beth ke life discuss krna is unforgettable. Thanks for making my 1st yr so happening. Milte rahio 😊

Prem Agrawal : Bhai Bhai teko dekhte hi first year yaad aa jata h meko 😂. Jb mera pdhke khatam ho jata tha sone wala hota tha tb tu ata tha hmesha pdhne ke liye, nd as a result infi galiya sunta tha 😂. Gaane suna suna ke to kaafi preshan kiya hi h teko bt tune bhi itni tareef krke pura badla liya h 😂. Infi Sherlock and GOT ka discussion ♥ Tera always happy and cheering attitude h tera, and bohot mast banda h tu, mchate rho and btate rho. Message krte rehna nhi to phir gaali sunega 💛💛

Nicho Priyatham : Sagar! For some reason you remind me of my roll per dada who was my dearest and so are you. It was truly amazing to see a person like you who looks at problems with a serene attitude while me facing the same problem(just don't name it). I wish your hardworking nature gets you more and more success. All the best!!

Sumukh Vaidya : It's been a great time interacting with you since your first year. That treat was money well spent :P Good luck ahead, and wish you all the very best. You're mentoring some of my ISMP mentees in the satlab team too. Aage machana roll bete !

Anirudh Singhal : Yoo Forever Freshie! Had lots of fun messing with you in satlab xD! Most of my stereotypes for EP junta are because of you, lab assistant. Jokes apart, you're a really fun and enthusiastic guy! Japan jaane se pehle mat mario bas xD

Keshav Janyani : Yo Sagar, you are definitely the free soul of our group. I have always had fun with you on outings.. the trek was definitely made more memorable by you (you know how :p) .. I hope you do great things in life mate and that our paths cross sometime again.. All the best :D

Vidhan Arya : Yo Sagar boiii! Bhai first year to infi maze the 16-C 5th floor pr 😊 And those "pokemon go" walks we used to have around old SAC 🔥🔥 2nd 3rd me interaction thoda kam hogya but still I enjoy it whenever we hang out 😊 The funniest moments for me is your epic "Galat aadmi se panga leliya tune, Zindagi narak bna dunga" dialogue and that one time when you asked security officer "Aapke paas kya proof h aap guard ho, aapki id kaha h", it was so fucking lit 😂😂 Aise hi aage bhi machate rhna and stay in touch brother 🤝🤝

Naman Aggarwal : Sagar bhai! The guy who earned the casanova reputation in the first year itself! It was really fun with you in the wing in the first year, man. Yeah, I do miss all the discussions and rants. You really took me down the memory lane, first year was gold! Sorry for that fight that night in the first year, maybe I was unreasonable 😊 I'm also an additional year at insti waise bhai, let's catch up some time. All the best for your future endeavours, my physicist friend!
