Tanya Gupta : Running across lakeside at 2am? Check. Basketball in the dark? Check. Teaching you flossing? Check. I remember after you came back from semex you talked about Denmark in every other sentence (their roads and air and way of life and what not), while also alternating between mentioning lithium ion batteries, talking about plans for 10 years down the line and having literally every single minute of your day planned on google calendar (omg how?) One favorite memory of mine has to be both of us being stubborn and standing in front of H5 in the middle of the road because I was feeling cold and shivering and arguing with you but doing absolutely nothing about it. :P All the best and stay in touch!

Aditya Chalishazar : Hello sir! It's been fun getting to know you. Your passion for everything energy is really unrivalled. All the best for whatever you do. Btw, it's funny how all of Rangan sir's TAs have birthdays within days of each other! Stay in touch! :)

Athul Arun Nambolan : Santa ! AUV, Energy Club and now in 5th year we had a lot more chances to hang out. Will definitely miss hanging out and discussing stuff with, probably more than India you know a lot more about US and Europe xD ! Let's stay in touch and thanks for providing all those fundaes, it helped me a lot.

Aryan Agal : Yo Santnam! I've know 2 versions of you, pre semex and post semex. I knew you as this dude who was serious but nice to interact with. We've come pretty far haven't we? Since semex you've been crazy. Our hangouts, with just us or with Tanya or our entire B99 Lakeside gang, it's been a string of happy times for all of us. Our nightouts-ish(till you'd fall asleep), talks in HN, Starbucks jaana (randomly) because you'd feel like(you're addicted dude). Love talking to you about life, people, passions and everything else. Found quite a friend in you thanks for listening and sometimes shutting me up. Your enthusiasm keeps people positive and going. Stay connected, stay happy. Keep calling me for HN

Satyam Mohla : Last 5 years, we have talked about all kinds of bakar from policy to energy to technologies, to just absolute novel crap, to even relegion... in all kinds of places, your bunker room, my H6 dungeon, walking around in campus at 12 (all cos you want to exercise demm), at the H9 bus stop, and since last one year, our hostel. I still struggle to remember how our paths crossed, but I am happy that they did. And yeah now, I am going to harangue you with bakar all your life. It was great having you around last 5 years. You have been an amazing friend.

Sudarsanan Rajasekaran : Yo Santnam! It was really nice knowing you.. always smiling and helping. Always get inspired by looking at your passion for tech. You enjoy the short chats from infi corridor to Energy department. Would often hear stories of NIOT the way you guys tackled flood and hurricane to come first at national level. All the best for all your future endeavours!!!
