We had so much fun while planning the event, meeting Khurana(expecting him to offer coffee at Starbucks 😊), investors ka katna, lights ke liye rona I admired the way you remembered all the startups and their pitch so well. It was one of the best learning experiences I had. 10 ki terrace pe ghanto discuss karna which option is better.🤔😊 There's a lot to learn from you. Stay in touch. ♥♥

Sarthak Khandelwal : hi, hii, hiii! ICED TEA? Literally feel like yesterday when you cracked the lame thanda garam joke and how you'd do it in your last sem! Time already!? Getting to know you be better over this last year has been really really fun. A bit sad that our only interaction for 5 sems was "Kitni bani?". I love how your conversations have picked up in the recent months and we talk about real things and not try different names on Professors. I'll miss you saying and doing weird things I could never comprehend. We have an ever growing list of plans which I hope happen soon and are all sponsored by you :) PS: I'm secretly happy none of us face the consequences of you picking 656. Hatred was too high.

Pragya Valay : Hi Samruddhi, bahut pyaar karti mai tujhse. Meetha Makkhan khilane ke liye thanks :P. Ab tere baare me mai kya hi likhu. First year me AIDS ho nahi paata, agar hugne ke liye tu sath nahi hoti. Uss din Terrace par jakar mujhse baat karne ke liye thanks. Itna badbad sun ne ke liye bhi shukriya. Bahut lambe time ke liye source of entertainment bani rahungi. Kuch din pehle room me dahi khate hue hosh udaane ke liye bhi shukriya. Bahut khana khilaya hai aunty ne, bahut aam bhi khilaye hai mere ghar walo ko. Kabhi alag nahi honge hum. I love Youuu soo muchhhh.

Kesha Tamakuwala : Saaaammm teko freshie year se abhi dekhti hu, to faith aata hai ki sachme nothing is impossible. The way you have transformed into this strong, vocal, rational (mostly) and undeterred woman has been so so amazing to see and be a part of. I love how you are always upto doing something new in life and how you manage so many things so well together. Tere ghar ka bht khaya haaii hamesha itna pyaar se khilane ke lie shukriya♥ i know you will somehow find a way to do everything you want to in life and I hope i am somehow a part of your journey ahead, I love you loadsss broo

Umang Chhawchharia : Yes we definitely need to catch up. I have always admired your opinions and your ability to make friends with almost everyone you meet. I am still mad at you and Tanmay for making fun of me that night :p. Wish you all the best for the future. Stay in touch :)

I hope ki jaisa insti mein infi machaya hai waise hi life mein bhi machati raho :D Waise, do you remember the story of Mapier's Law? :P

Mookund Sureka : Kaafi bakchodi ki last sem SMP and prep mei. Teri Paris mei katne wala story mast hai (laugh reacts only). In intervals we have interacted kafi, TF marketing and exchange, SMP etc. In this last year we particularly I think we have bonded quite a bit and had loads of fun together. Haan also ab toh time pe aana seekh jaana :p. All the best for your consulting journey and stay in touch. :)

Mrunal Chavan : Yo Samruddhi!!! I like it better than Sam tbh 😊 Yar tera ghar bohot apna apna feeling deta & d food is ♥♥ Jitna Jainism ke bare mai tere se pata chala hai uska 5% bhi Indian Philo. course mai nahi sikha. 😊 I remember tu around 10 room pe aati thi & apan teno used to talk on random stuff, philosophies etc & subah ho jati thi. 😊 I too hope ki apan kabhi kisi chij pe collaborate kare be it art work or anything else, shayad apan ne first yr mai DIC sath padhne ke baad kuch aisa kiya he nai. 😊 Well that ws fun too 😊 Bohot awesome insan hai tu, I like how u always try out new things & work hard towards making evry effort count. 😊 Always keep ur hunger for success alive. Bohot macahegi tu. Loveu2 ♥♥♥♥

Karan Trichal : Yo! Again, lost count of how many labs we've done together :P. The power electronics lab in the elec department stands out though, because of the antics of our group-mate (if you remember :P) xD We've talked quite a lot, and on a huge array of topics, but yet it feels like we've talked too little, because of the array of topics :P Thanks for making Cognition and Emotion classes more interesting on the rare occasion that we both attended it :P All the best, and stay in touch! :D

Praveen Saran : Yo Samruddhi! Mera insti life ka best decision coordie year mai apke sath kaam krne ka tha. I can't thank you enough for that opportunity and trusting with everything. Vo 1.5 months mai bhut kuch sikha hai apse. Baki machate to aap ho hi, ye post padhte padhte bhi kuch kr rhe honge sath mai XD. #TTMM forever < 3

Divya Maddu : Hi there 🥰 Thanx for always talking to me whenever I used to fill bottles or my ranting regarding research related stuff in mess.. I still remember how much I kept on blabbering about it that I lost track of time 😊 But to honestly say it was mainly as my "water cooler" friends is how I remember you guys now. Nobody in the history could say they had a nice time filling bottles... All Thanx to you guys. BTW I like your red strand of hair (dont know what it's called 😊) All the very best for your life ahead. And stay as cheerful as you are now 🥰

Suditi Laddha : Samruddhi tujhse baat karne se hamesha achha lagta hai. Tune meri kaafi madad ki especially to get over my fears. Although I didn't manage it, you being there meant a lot. I'll miss you and I love you. Bain mein idhar udhar projects ke liye jate hue mujhse milne bhi aajana kabhi :P. Stay in touch

You have been always very helpful and approachable. Thanks for always staying in touch with me. Let's catch up once this lockdown ends.

Ayushi Panghal : Hi dodo, we have shared a small part of the last 5 years through assignments, notes, 'kuch nahi mugga yaar', sem ex pains and hatred towards you know bas-who. :p Here's to smiling while looking back at them and happily looking forward to the times to come together. Love, ayu. <3

Fatima Salehbhai : Hi dodo, message karna please. Mereko Teri Yaad aati hi rahegi. Miss you and love you

Dhruvin Mehta : I don't think i'll ever forget our first interaction at Laxmi. I judged you hard that time! Aur fir uske baad kuch random games aur placement ke waqt I realized you are crazy. Crazy good at whatever you do, that is! Hoping we run into each other in the future too! Keep being the stud your wingies keep telling me about!
