Yearbook
2020

Satyam Rai : Hey brother!! I know you are too cool for the Yearbook but I am still gonna write. One of my biggest regret is that I didn't spend much time with you in first two years. We always used to agree on everything, music, anime, movie, series. I still remember first time when we donated blood in first sem after doing NCC exercises, you slept for 15-16 hours straight😂😂. You made last year the most enjoyable one, thank you for getting me out of the room for the exercises. I really wish that we could spend more time in college together. You were always the one who 'live larger than life' type guy. I hope you do that all your life man. Be happy and safe.
