Bhishma Dedhia : Yo Deepak! So glad to have BCed into elec because I found you. Sabse pehla interaction network theory mein hua tha apna when we sat next to each other and by the end of the class apna discussion went all existentialist. Uske baad apna courses aur intern ka RR chalta rehta tha xD. DPAC2.0 bahut maza aya be! I will cherish all those late night meets and debugging sessions with you and KP. Grad school mein world's most advanced hybrid computer invent karna hai yaad rakhiyo. Thanks for helping me get through grad school apps! Ab Stanford<-->Princeton hota rahega and PhD ka cribbing chalta rahega. Looking forward to read your groundbreaking research ! (agar kuch chamke toh xD)

Parthasarathi Khirwadkar : Yo Deepak! We only started interacting after you joined EE dept in sophie year, and I did find you to be a little bit of a b***h in the beginning. Since then, I have learned to take your RR with a truckload of salt 🤔. Only in the third and fourth year did we get closer while working on EDL project and having random corridor discussions in H18. My first TA-ship at IITB was made memorable by our MA106 revisions and the infi cribbing after every TA training session 😊. Listening to your unique POV on every topic, from politics to acads to marriage has always been a lot of fun 😊. Let's just say, you always left me satisfied and smiling at the end of a long debate (That's what she said 😊). I am sure that you would be an exceptional PhD candidate at Stanford and a tyrannical professor in the future 🤔(just kidding). Till then, west coast me machate he!

Hemant Kumawat : Riding Mumbai Ferry to Cruise in New York, from binge-watching Netflix in my room to going out alone for pizzas, we did it all. Our group broke pretty early, but still, we did not let that hold us back. I don't remember ever saying us Thank you, Hello or sorry because our friendship was above all this formality. Maybe that awkward and rolling DJ night in freshmen year was one of the factors why we bonded so easily. I think that is an "I'm gonna tell my kids" story. You, me, and Rajan had some great fun in our first year. I could end this by saying thanks and love, but then again we don't need it. I hope we remain connected forever and have some more great memories.

Pranil Joshi : Yo Deepak! You're an inspiration in many ways. Glad to have known you in the last 3 years. Ronaa band kar xD. When you cried, I used to think I'm not the only loser around (remember our analysis of pre-midsem marks for EE325 in LHC ka lift?). But you're a winner, dude. You do deserve all of your many laurels, and there's a lot I can take from you. I also learned that you are not the proverbial studious "good boi" that people who don't know you might assume. We all now know of your twisted life priorities, for one. There's also a lot I don't know about you yet, of course, but we'll have a lot of time together to fix that. I am eager to listen to more of your nihilistic rants. See you around!

Navnit Kumar : Deepu bhai life me thoda chill kr le bhai rest kr liya kr kabhi kabhi. Fun aside you are a geniunly good person. All the best in life. Cheers
