

HEMANT KUMAWAT

Mechanical Engineering
Innovation Cell | NSS

Yearbook
2020

Sumanth Kandala : Although we really only started talking since our sophie year, it feels like we've been friends since ages! I'll never forget those nights in UMIC lab and all those "2 Grilled Sandwich Parcel" accompanied with long talks in Campus Hub. Thanks for all your help and for keeping me entertained during these past years! I hope we stay in touch for years to come!

Deepak Gopalan : You are my closest friend from insti! Our group of 4 broke down pretty quickly, but you and I always stuck together. Apne future ka planning mai tere saath hi karta tha hamesha! The gossiping was also kaafi fun. My only 'saath mai kabhi startup kholte hai' friend in insti. Lets keep in touch during our PhDs! Remember, Dr. Hemant will always owe me a big one lol. Jab tu California ghoomne ayega, mai badi wali treat lunga!

Atharva Jaipurkar : Yo man, we first worked for the DRDO in second year together, uske baad as OCs! Kaafi ups and downs aaye, fuckups bhi hue, all along with placements, univs ka tension! But finally sab sahi hogaya! It was a great team effort by us, sumanth ,amogh, trishant for the very least! Will surely miss this time! Wish you a very good luck for your future!♥ Macha dena!! Take care😊

Goru Meher Ritesh Kumar : Hey Kumio, Remember the cricket we used to play in our lab? Humne kithne balls ghumaadiya yaar. It was nice working with you in Innovation Cell and All the best for your future endeavours.

Trishant Roy : Thank you for all the help and tips! Third year ke intern ke samay kaafi help kiya tune and Sumath ne. In chaar saalo me saath me kisi project me kaam nahi kar paaye. Agar hum dono prof bane toh mere idhar talk dene aana please :)
