Pujan Biswas : "Tereko yeh proof aaya kya?" this is the kind of first interaction in our tuts. I think I have a thing for introverts and making them awkward. One can talk for hours with ppl & you could have crept slyly without anybody knowing, kaise kar lete ho yeh, ISI se ho kya? To the amaze photographer, irritating perfectionist :P, "mai accha sketch and synth karta hoon" to "mai gaadi chala lunga", it was a silent roller coaster but a memorable one. Keep your creativity up always along with the beardy smile. Don't get bogged down by the uncle chants of your brother's mates :P SGNP was real real fun, the bus ride more so. Kaafi RL and appropriate gossip, haha. Arggh, this word limit. Fire & Blood, Bisso!

Ayush Dubey : The great designer and photographer, how the hell do you learn everything so quickly, kabhi photoshop, kabhi illustrator, kabhi app development! Over the past years, our friendship has blossomed so well and I'm grateful for that. You coming in with 'kitna maga' was the motivation for me to start studying so many times. You've introduced me to resources which upped my course grades at least by 1 point each. I'll definitely come to visit you on campus. Having such a reliable and helpful next to next door neighbour is a blessing. Bass formal emailing time pe karna seekh le, baki toh you'll do great wherever you go! All the best!

Varun Sule : Hey, it has always been fun interacting with you, you've always had something interesting to add to our every conversation. I've been in awe of, and tbh envious of your numerous talents. Keep rocking it in controls, and thanks for always being by our side in Insight, you've been of the greatest help in holding the fort down in the design team. Stay in touch!
