Harsh Jain : Glad to have Cos like you guys. Kaffi jyada sikha tumlogo sae. It was completely different hanging out with you. Our discussions were always fun & your jokes 😊. You guys really handled it well.

Saipriya Satyajit : Ugh, he is going to use the same beginning line again is what you’re thinking right 😂, bhai I use it because it is true down to every word and that’s the first thing that comes to my mind when I think of you, a brother. I am really going to miss you, and I seriously don’t think I will find someone so good at puns. Speaking of which, do go a little easy on puns and sarcasm, not to mention please avoid laughing at serious situations 😂. Others reading this, don’t get the wrong idea, Mr smirky smile here is a very caring person, I can cite numerous examples of him being by my side listening to me when I was down and trying to cheer me up, with occasional use of puns on me 😂. Love you bhai ❤️.

Keshav Janyani : You are a special person Abhisek and also one of the smartest human I will ever meet in my life. I will always remember our late night talks and study sessions. You are the person I can be real with about many issues. I hope you achieve great things in life. Work on your humour and you will definitely end up as Jake Peralta of the Physics world :p

Sukanya Kudva : Hi there, Sahu. Well, I don’t really think I’ll have to say good bye to you. 😊 Give our track record of coincidences, from being lab partners in almost every lab to our summer internship, maybe our paths will cross sometime soon again. Till then, I’ll remember your once-in-a while treats, your everpresent smug smile and your crazy laughter (i end up laughing at you more than at your jokes 😂). Your curiosity to learn just anything is great, man. I’m sure you’ll do something great in your life ahead.♥ I’ll look forward to another chat (over coffee?) with you in future. And if I’m lucky I’ll finally get to taste your coffee then. 😊

Kinjal Saxena : Hello pampers! From being one of my physics enthu partners to someone I shared deep conversations with.. from our study, discussions and movie night outs in physics lab to loads of chitchat and fun we've had, I'll always cherish our memories together. I remember how I came running behind to prove u wrong in a math question u solved in tut to the fun we had after Jigyasa quiz in worli and trying the falooda which I never liked :P. From long walks in insti to soothing talks I had when I felt low, you've had been a great friend! Honestly, you're one of the sweetest people I have met in insti. I'll always stay and watch you go places in your quest to satiate your thirst for physics! Pika pika :P

Sagar Kumar Seth : Hello Anda Sahu ! or Helloo Ji *creepy smile* I really don't remember when we first met. But I feel you have always been there. From helping me out solving doubts day before exam to laughing out loud on our reference jokes, we became close friends. I still remember when things went south on our trek :P, you remained really calm and hugged me. Fun sahu also had a real mature side. That I got to know more deeply through our late night chats. Where I also get great tips from the "love-guru" of Bosonic gang. I have always been inspired by your passion with which you study or teach a topic. In ways you have helped me keep my interest in physics alive. I hope the best for your future endeavors !

Aman Sharma : Yo Sahu! It's always fun talking to you, you have this peculiar way of looking at things which is refreshing. Your thoughtfulness and deliberation in everything is admirable. Always original, unapologetic and content you're a great friend to have!

Atri Dutta : You meet very few people insti mein who have a profound effect on your choices. You are one of them for me. I never told you this waise, but your Enthu for physics motivates me so much. Kabi na kabhi we’ll learn QFT too, haan 🤔? I’ll hamesha remember your puns :’), they crack me up. Beethoven Dvorak sunte rehna, hopefully we’ll get the chance too go to a concert someday again, mereko jazz concert jaana hai. Canada mein har saal durga puja zaroor manana. Baatein to hoti rahengi, as some guy once said, where words end, music begins.

Mrigank Ashesh : Bhai tereko mimicry artist hona chahiye tha...Aap iss line main kaha se aagaye 🤔 All the best sirji for your future. Machate rehna, paper & note chaapte rehna. Kabhi hume bhi yaad karlena.

Athul Arun Nambolan : The brightest of physicists in my circles ! It was always fun to have discussions with you and kartik all along. You people could convert even the bad tea at H-8 into a discussion of tea-leaf paradox. You guys always managed things very smoothly, rarely I had to bother about MnP expect when I want to attend a session or discussion. Good to have you as a friend. All the best dude !

Adane Sahil Ravindra : Bro! Needless to say that you are very smart and very good at what you love to do. But, what i liked the most was your interest in persisting with a conversation until we find something we both love to talk about. And we have had many such conversations - music and coffee being just the two of those topics. Good luck for your future! I know you will do great. We will catch up from time to time!

Kartik Patekar : Yo Sahu! *In Morirarity's voice* "everything I have to write has already crossed your mind". Dude, you can literally my mind most of the times. There are too many memories to write here, we have been greatest rivals and achche dost for so long. From Jigyaasa in first year to Mimamsa to TCMP project, we have done almost all academic stuff together. MnP and BG have been some of the best thing that happen to me in Insit, and you were there during both of them. You love for food in unparalleled and has resulted in me eating out often. In Physics, there is hardly anyone as passionate or as smart as you, and you are bound to do great! Do remember that we are gonna have a start-up together!

Sowmya Ravichandran : Hey Abhisek! I wish we started hanging out earlier, because I have had a lot of fun with you. You're always up for ice cream at any time, just like me, and that makes you the best ice cream partner ever :P You are a very interesting person and I have always loved our conversations. I think that the thing I will remember the most about you is your love for music and how one can never spot you without your headphones. Keep doing awesome things and stay in touch :)

Debanjali Chatterjee : Hey, captain of our Mimamsa team!! Right from the beginning, you were the glue that held our team together. I remember our poster presentation prep in the Physics dept library, H8 (with all the mosquitoes) and also at IISER. Kaafi interesting discussions huye the. Your knowledge on such an intriguing topic amazed me. You're also a really nice person to hang out with! I'm glad I got to know you and interact with you. All the best for your future, keep in touch!

R Sucheta : Hello fav person aka my berro, My convener year wouldn't have been the same without you <3 (maybe better ;P jk) Those were some good times, thariq ko irritate karna, discussing our random stories, cracking the lamest of jokes, ek doosre ko broooooooo broooooooo bulake pareshaan karna, commotion during our events, food outings (FaT yaad hai? apna adda :P), and so many more. :) You are one cheerful, jovial and sweet person, turning everything so lively with your vibes. Don't lose that <3 And yeahhhh, lets hope we cross our paths sometime, broooooo. All the best for quantum dgigdgaif (mujhe kabhi samajh me nahi aaya :P), you deserve the best <3 P.S. Thankyou for the free MnP T-shirt ;P

Shobhna Misra : Yo Sir! Yes, we definitely have better WhatsApp conversations than in-person, not because I am too busy, but because you are :P But yeah, we have had some good informal conversations during the tenure. And as far as bringing sweets goes, you have also done a fair share of that! Thank you for that... Let's meet up in Bhubaneswar after things settle down, and of course we will keep meeting around the world. I have always admired your perseverance and enthusiasm for solving theoretical problems in quantum computing and the like, keep that up! All the best for grad school and whatever lies beyond! :D Stay in touch, and keep up the Odia conversations xD

Edwin Saji Uthuppan : You will not have noticed the ways you influenced me. Once, when I was trying to improve my pullups in h8, you busted out 3-4 of them easily: That brought out my competitiveness and motivated me to beat you man(Now you don't come anywhere near me in pullups :P). You also made me realise that communism although a great idea theoretically had many flaws whenever it was implemented in reality: This was the exact reasoning I was using against religion but I didn't apply it to communism (I don't remember what exactly you said but it was a small sentence in the middle of one of heated discussions which made me realise this). There is more but word limit... Keep in touch bitch.

Arush Gupta : Abhisek, Bud, I will never forget the tone you (and Kartik) had set for MnP as managers. The MnP that you'd built, saved me from a bad wreck and it was because of that, that MnP was that much more valuable to me than anything else in insti, and I will always be grateful for that. I still remember having my first proper interaction with you after the Einstein and Eddington biopic, that MnP had organised sometime in our 5th semester, and then going to NCPA and roasting the names of the shops around Marine Drive to Bruno Mars' songs that the trio of us had cooked up xD Damn, the thought of buying that dagger for Sai sir from that shop xD Will definitely keep in touch, mate :)

Abhinav Jain : The person who is more capable than me at cracking poor jokes, seriously dude kaha se latae ho? Among the many lessons that I learnt from people in ITC, you taught me patience and I am so very grateful for that. I still cannot forget those sessions in H8 mess where you, kartik, me and athul used to have chai pe charcha (like literally, chai ki physics pe charcha xD). Working with you was so much fun, hope we stay in touch!

Preetam Pinnada : You brought in a positive delta to my life. I hold our shared moments very dear and close to my heart. The high achieving and chocolate boy boss (no I'm not being racist) is how I'll remember you. From a lifestyle coach to a career guide you've played many important roles with ease. Keep inspiring us. Wish me luck. All the best!
