Pranav Sankhe : Krishna Subramani! If the devil asks me for my soul, I would trade it for a friend like you. Starting from solving together a differential equation for Prof. Shevgaonkar's project to talking on Authoritarianism, I don't think there's a cap on what we have and can discuss. It's been a true joy to share thoughts, hopes, and dreams. And I am sure we will continue to stay in touch. If someone asks me to give one adjective to you, out of the other amazing things you are, I will go with resilience. Grad school mein macha dena!

R Aditya Narayan : Hey future roomie, I have never met anyone as passionate and nice as you. I've enjoyed the talks we've had in the last year and always liked discussing our research and so many other things. This will definitely be a constant for the next couple of years and I'm happy that we got the same grad school for that very reason.

Prakhar Jain : Krishna Broooo, you are the best. You are one of my closest friends. I always felt so comfortable talking to you about anything and everything. God bless my soul when I took optimization as a course and found a friend in you. I cherish the time spent with you solving Kulkarni's assignment, studying for GRE, discussing crazy South Park, countless Ovenstory Pizzas, Faasoos wraps together. Your curiosity, intelligence, honesty, and warmth, resonated with me and brought us close. I look forward to staying in touch with you in the future and I know you are gonna fare well in your future pursuits. Nonetheless, Best of Luck!

Anirudh Singhal : Krishna Brooo <3. I'm glad you were our mentor in that ERC hackathon. Thanks for all the fundaes <3

Ravi Kumar Kushawaha : It was a great honour to be your roommate for one semester. Our endless discussions on infinite topics. Watching 1917 in Imax and Rajdhani dinner were good memories. Aapke jaise down-to-earth person, research enthusiast, jitni bhi tareef ki jaye kam hai.

Hrushikesh Manoj Loya : Yoo Krishna!! You are among one of the few people I met who is a deadly combination of extremely smart, helpful, and down to earth! Its always to good to discuss anything with you, and it's easy for anyone to spot you in the dining room, cause of your loud voice... hahaha! Rooting for you! Best of luck (y)

Sanket Agrawal : Krishna Bro! I have never thanked you enough but really really thanks a lot for teaching me so much at the last moments, for clearing my doubts and putting up with the silliest of them without any anger. Without you, I don't think I would have done even the bare minimum I was doing. You are genuinely good hearted. All the best for future and stay in touch :')

Aniruddha Suhas Deshpande : You've always been a great source of inspiration to me! I am still to hear you talk about your research and interests with so much passion as you. It was nice being in Barcelona with you, won't forget the Montserrat trip and late night beach walk! Also so glad we worked in the same lab, always nice taking coffee breaks with you and chit chatting about all kinds of things. You're also a super duper helpful guy and I appreciate that so much. I know you're gonna kill it going forward, at UIUC and beyond! Lets stay in touch!

Lakshya Bandhu : Hey Krishna, One good thing that happened out of Prof. Gadre's course was that I got to know you and we became friends since then there have been a lot of things about which I became informed from you. You have this great quality to learn new things and share it with other ppl which I highly respect and will help you in your future studies. All the best for your future endeavours and will try to keep in touch.

Anmol Kagrecha : It has been fun having conversations with you over the mess table in the past one year! I admire your enthusiasm for music tech and your dedication & patience that allowed you to do amazing work in the DAPLAB :D I am sure that you will have a great time at UIUC!

Devyani Verma : I am so glad we met in Barcelona and I got introduced to an amazing person like you! I love your passion for music tech and I know you are going to achieve great heights. Thank you for making the Costa Brava trip so memorable and our random conversations in department really gave me the courage to switch my guide. All the best for everything in life dude! (and I hope you never need to put up with anyone like you-know-who :p)

Abhishek Singhal : Yo Krishna bro!! Interacting with you everytime was a whole new learning experience for me. I have always seen you smiling whenever we meet. You come as a great pack of knowledge and positivity. I really feel we should have interacted more in our early years. I am pretty sure you will achieve great heights. All the best to you and i hope we will stay in touch. :)

Pramey Singh : I have learned a lot from you since you moved to the wing. All the best for your future research, I'm sure you'll excel at it.

Darshan Tank : We go long back krishna. Do you know that you were one of the person that gave me confidence in first year to do a branch change? I used to think that it's too tough, and then you came and said 'Padhna hi to hai, padh lenge'. And then we never looked back, hai na? Studying every week, those 4 hr ED preparation before each Monday, maths tutorial discussions. I am really grateful to have you found you in first year (I mean 6 people with BC possibility on same floor, insane, right?) And elec me bhi you have always helped with those last minute doubt soving sessions. Ya, things didnt go as they should be in the 3rd year, but now you finally know the reason. PhD macha dena, and stay in touch :D

Rohan Pathak : Krishna, kitna enthu se kaam karta. Dayumm. I have learnt to appreciated and love one's work looking at you. You are so much cool. Sab kuch kar leta hai. Kitne baar tog apan Department canteen mein hi mile hai haha Also Shah ke room pe aata tha tab kitna mast milke baatein karte rehte the :) Pel diyo PhD mein, which I am sure you will :p Bhuliyo mat :)
